

The NEBCO™ Sealing System

New England
BRAIDING
COMPANY INCORPORATED Since 1979

The NEBCO™ Sealing System is designed for optimum service in pumps and valves. Each part of the system can be used individually, in combination or all together to create a complete sealing system. Using each component individually allows the freedom to combine our products with other fluid sealing products and systems.

NEBCO's™ AKII® Packing Technology:

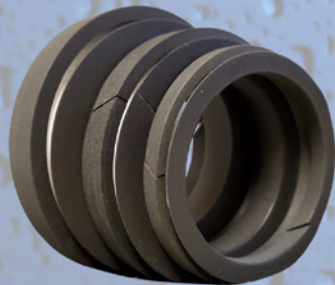

- Lower utility costs.
 - Reduce water usage.
 - Reduce equipment wear.
 - Reduce spinning on startup.
 - Increase running time between adjustments.
- *Available as single rings, cut lengths, ring sets and bulk spools.

When used together the NEBCO™ Sealing System makes a difference that you can see.

The LRC™: (Lantern Ring Coil)

- Made from PTFE.
 - Allows flush water to cool the shaft.
 - No scoring or galling of the shaft or sleeve.
- *Available as a single ring, part of a ring set or in 6 or 12 foot coils.

The SATB®: (Self Adjusting Throat Bushing)

- Stabilizes the equipment shaft.
 - Creates a tighter shaft clearance.
 - Provides a proper seat for the packing.
 - Impact and thermally shock resistant.
- *Available as a single SATB® or as part of a ring set.

Standard square packing
6 months service on 3%
paper stock.

NEBCO™ AKII® packing
13 months service on 3%
paper stock.
