

Ring Set Program

New England
BRAIDING
COMPANY INCORPORATED Since 1979

Almost all of NEBCOs™ braided packing styles can be die molded into pre-sized and pre-packaged ring sets for ease and convenience. (Core Versions not available Die Molded)

NEBCO™ Ring Sets are pre-labeled by style, size, number of rings, stores codes, bar codes and QR codes (when supplied). In addition, all ring sets have skive (angled) joints whenever suitable for the style of packing and application to give the most reliable sealing possible.

Skive Cut

Butt Cut

Both standard and metric sizes are available for a variety of equipment.

Take the stress out of packing a pump!
Choose ringsets for safety & ease!
Sized right the first time, every time!
Let us make the cut for you!

Benefits of Ring Sets

- **Eliminate Waste:** The right amount of packing for the equipment, no miscut rings.
- **Safe & Fast Installation:** Easy reliable ring seating with no time wasted in cutting rings from bulk packing.
- **Reduce Misapplication:** The correct set for a specific piece of equipment identified by store codes and equipment information minimizing time spent on purchasing, receiving, and storeroom administration.
- **Reduce Inventory:** Common stores codes for multiple pieces of equipment create interchangeable replacement sets for more than one piece of equipment.
- **Track Costs:** Ring sets become standard parts for the equipment and can be used to track the equipment operating costs more efficiently and effectively.
- **Non-contaminating:** Easier to keep required packing clean until install.
- **Additional products available:** SATB® (Self-Aligning Throat Bushing), LRC™ rings (Lantern Ring Coil), GRT rings and GMTFE rings.

To order, please supply:

1. NEBCO™ Style number desired.
2. ID. X OD. X Number of Rings
3. Make, model and size of equipment.
(If available)
4. Stores (inventory) code (optional).
